## GENERAL INFORMATION ON FIRE

- When a fire is important that everyone in your home can quickly get out. Discuss why your family about how you should act in the fire and how to get out from every room.  
**NB! Arrange a regular meeting place outside your home.**
- It is important to have easy escape routes from the house and out into the open. **NB! Keep escape routes clear.**
- Make sure windows and doors are easy to open and consider whether there is a need for additional utilities as an escape ladder or the like.
- In the event of fire, remember that fire smoke is highly toxic. Do not move long distances in smoke-filled rooms. If it proves necessary, stay low by example. to crawl on the floor. If it is dark, orienteering along the wall, so you always know where you are.
- In some cases - if you know the fire department is on the way - it may be most appropriate to be in the room or, for example. a balcony to the fire department has arrived. Give so, clear signals about where to stay, so you can quickly get help.

## INFORMATION - EXERCISE

### SECURITY

Fire can be a scary topic, especially for children. It is important that parents appear to be confident in how they should act in case of fire. This helps to give children the confidence they need. Conduct fire drill as a game without too much seriousness, so that children are not anxious.

### DRILLS

Before the fire drill, parents should talk to children about what fire is and why it is important to have fire drills. Tell them about smoke alarm and what it means if it beeps. Make some simple rules for what children should do if it starts to beep and it smells like smoke.

### EXERCISE

Find the plan that suits the family best. It is important to practice in case of fire. In a fire drill should train for practical evacuation of the house. Try the various escape routes from several rooms. Make sure escape routes are readily available and that doors and windows can easily be opened from the inside. Consider the need for additional aids escape ladders or similar. Agree on who goes first and who goes last

The family should be sat down for a few minutes to evaluate after the fire drill. Every time you practice, you will find maybe something can be done better. And in this way, both children and adults are safer on what to do in case of fire. Repeat the exercise regularly - at least twice one year.
