## ➤ A four-layer textile glove with a membrane.

- The basic material of the back of the hand is super resistant PBI® that also increases protection against mechanic and heat risks.
- The palm is made of Kevlar with silicon layer that ensures resistance against heat, abrasion and cutting and provides high sensitivity and work comfort thanks to its flexibility.
- On the back of the hand there are Kevlar® reinforcements providing better protection in the most exposed parts.  
The glove is equipped with highly permeable and waterproof Porelle membrane that also forms a barrier against bacteria, blood and chemical agents.
- Further layer is aramid textile which improves protection against both heat and mechanical risks.
- Direct protection of hands is ensured by the last layer - aramid lining with increased grammage that guarantees comfort when putting on and taking off even if the glove is wet, as well as an increased thermal resistance.
- The gloves are made with COMPACT

wristband.

- The design of the wristband fits perfectly with the flexible sleeve cuff of the firefighting coat and its upper layer and it enables easy putting on and taking off even in wet conditions.
- **The gloves are tested and certified according to ČSN EN 659:2004+A1:2008 - Protection gloves for firefighters.**
- **DuPont™ and Kevlar®, Nomex® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.**
- **Size assortment: 6-7-8-9-10-11-12**
