RESEARCH LABORATORY (USA)**

SweFan 21" is the latest model of our PPV fans, manufactured in Sweden.

This new model is a result of all enquiries received, mainly from customers abroad asking for a high quality fan with a high capacity but smaller in size than our larger fan SweFan 24".

The size makes the fan easy to store on fire trucks and in other spaces.

SweFan 21" is direct driven and powered by a reliable Honda engine. The unit is running with a minimum of vibrations and stays stable on any surface and in any angle.

Big wheels and a handle ensures easy transportation.

The fan can easily be tilted in 5 different angles.

All the unique accessories we manufacture for use with our SweFan 24", like exhaust hose, door adaptor and Hi-Expansion foam adaptor "Skumrask", are also available for our new SweFan 21" making it into a versatile fan you can use for a lot more than just moving air.

Technical data

Actual airflow	28.791 m ³ /hr (8 m ³ /sec)*
Additional airflow	Variable
Engine	Honda GX-160, 5,5 HP (4,0 kW / 3600 RPM)
Shroud	Steel, powder coated
Fan	Dimension 21" 8 glass fibre reinforced polyamid composite blades
Frame	Steel, powder coated
Height	670 mm
Length	500 mm
Width	630 mm
Weight	39 kgs
Article number	32-1000-07

Accessories

Name	Article number
Exhaust hose, flexible, stainless steel, 5 m long	32-1000-04
Door adaptor for pressurisation of rooms or Hi-Ex foam filling	32-1000-08
Hi-Expansion foam adaptor "Skumrask"	32-1000-09
Lay flat air/foam transport hose, 575 mm diam x 100 m	32-1065-10
