

SABRECOM

RADIO COMMUNICATIONS INTERFACE

SABRECOM is a unique radio communications interface that fully integrates with your choice of Scott facemask. Available as a complete communications solution on the Vision 3, PanaSeal, PanaVisor and Promask facemasks, SABRECOM is approved to EN136 Class 3.

PRODUCT HIGHLIGHTS

- Fully integrated ready-to-use communications system
- Intrinsically safe ATEX approved
- Internal microphone positioned inside facemask
- Flexible boom style ear-piece
- Simple fitting and operation

HEALTH & SAFETY

SABRECOM

EXPERIENCE THE BENEFITS

Latest approvals

Intrinsically safe ATEX approved. Also meets stringent test requirements for flame engulfment, heat resistance (EN137: 2002) and IP67 rating for water resistance and dust penetration.

Fully integrated

No need for tools or dismantling of the facemask. Complete ready to use communications solution that is an integral part of the facemask. Supplied with an adaptor to suit the user's choice of radio.

Loud and clear

Extensively tested in high ambient noise atmospheres above 100dBA, SABRECOM utilises a microphone positioned on the inside of the facemask to provide optimum clarity and excellent speech reproduction.

Flexible

The flexible boom style ear-piece can be quickly positioned for user preference and comfortably sits inside modern close fitting helmets.

Easy operation

The large 'push-to-talk' button is attached to the harness using a freely rotating clip, enabling the user to position the PTT button where they like. Facemask connection is through a simple 'push-and-twist' bayonet mechanism, allowing for simple and fast removal for cleaning.

Safety as standard

Manufactured from the same glass filled polyamide material as all Scott facemasks to provide high heat, flame and impact resistance.

SABRECOM works in tandem with any of the radios below. Other adaptors are available upon request.

Part Number	Manufacturer	Brand
2014183	Motorola	GP900, HT1000, MTS2000, GP900, 1200, 3600, HT1000, 1100, JT1000, MT2000, 2100, MTS2000, MTX838, 2000, 8000, 9000, PTX1200, 3600 Transcript Stealth, XTS-3000, MT6000E
